VirtualBox:

Note: 1. How is your OVA backup strategy? Daily? Weekly? Once only?
2. Record the amount of time to complete each task.

	Task	Duration
1.	Change the " root " password.	
2.	Create a new directory (eg. " week04/ "). Enter that new directory.	
3.	Create a new " program1.c " file to print " Hello program1 ".	
4.	Create a " Makefile " for the program1 above.	
5.	Create a new " program2.c " file to print " Hello program2 ".	
6.	Update the " Makefile " for the program2 above.	
7.	Modify the programs above so that program2 will always print after program1 .	
8.	Add file " queue.txt ", modify program1/program2 so that the print sequence depends on the order of the program names in the " queue.txt " file.	
9.	Generalize for program1, program2, ..., programN .
