Check List 04b

See also: **https://github.com/UI-FASILKOM-OS/SysProg/blob/master/CheckList/CheckList04b.pdf**

VirtualBox:

		Task	Duration
1.		See `Checklist04a.pdf`	
2.		Reenter directory week04/ (the directory in `Checklist04a.pdf`).	
3.		Reuse all previous c-programs and Makefile.	
4.		Create a new `"program0.c"` that controls the sequence of programs that are listed inside file `"queue.txt"`.	
5.		Check if the programs inside the `"queue.txt"` exist and executable.	
6.		All other programs shall signal program0 if they are ready	
7.		Program0 shall signal the programs one by one according to the order of `"queue.txt"` list.	
8.		Only program0.c is allowed to do screen printing (`"printf()"`). Modify program1.c, program2.c, ... so that those programs send a string using a shared memory to program0.c.	
9.		Create a `github.com` account.	
10.		Clone: `git clone https://github.com/UI-FASILKOM-OS/sp192.git`	
11.		Create your own directory inside the SandBox directory.	
12.		"push and pull" your work.
